

DESCRIPTION

The **GEFCO #PE108 DS Large Suction Debris Fixture** provides suction pit debris protection for suction piping intakes. The fixture may be provided with either flat or recessed debris screens. The fixture may also be utilized for either 12", 16", 18" or 24" suction pits. This unit is provided with a 1-1/2" x 1-1/2" SST mounting frame for both cast in or surface mount design and is equipped with 1/4" perforated debris screen equipped with 2 SST 3/8" handle bars. For recessed versions use **GEFCO #PE108-DSR**.

The sump is created on-site and typically is made of concrete. For preformed suction sumps specify **GEFCO #PE108 Series ABS** molded plastic sumps

Once the frame has been mounted the stainless steel debris screen is then placed over the top of the frame to prevent debris entering the sump pit. Optional SST anti vortex plate are available in tile set formed square configuration. Please specify **GEFCO #PE108C-XX AV Plates** (where xx = the size, specify).

When specifying, please use the following suffix to ensure the proper version is provided:

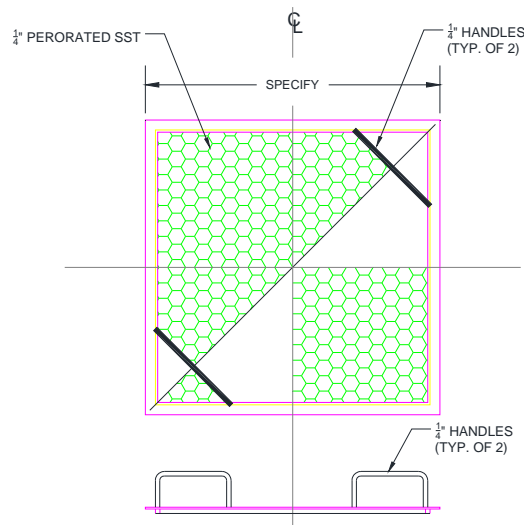

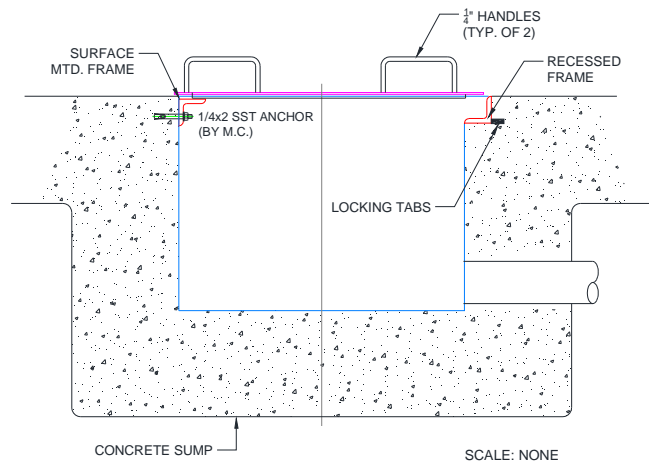

GEFCO #PE108-DS-YY

YY = 12", 16", 18" or 24"

TYPICAL SPECIFICATIONS:

*** GEFCO #PE108-DS-XX Debris Screen:**

- YY" 1-1/2" SST Surface Mount Frame (specify size), or
- YY" Removable SST 1/4" perforated debris screen with 2 ea. 3/8" Handle bars.
- Specify Sizes of PVC entry connections
- Side connections also available (consult factory).
